RBH ADDS TO ITS EVER-EXPANDING LINE OF CUSTOM IN-WALL/IN-CEILING SPEAKERS

Layton, Utah -- RBH Sound Inc. introduces four new additions to their custom in-wall/in-ceiling speaker offerings including two commercial in-ceiling speakers.

The TK-615 is a 2-way loudspeaker similar to RBH's popular TK-6 *in-wall* loudspeaker, but designed for *in-ceiling* applications. The TK-615 features a 6½-inch fiberglass-matrix woofer mated with a 1-inch aluminum swivel tweeter, which can be aimed at the listening position. Current interrupt circuitry (featured in RBH's popular TK Series) is also utilized to protect the tweeter.

The MCS-88, newest member of RBH's MC Series, is a dual 8-inch in-wall subwoofer with an ingenious twist. The MCS-88 features two 8-inch aluminum cone woofers connected independently allowing the ultimate in installation flexibility. The MCS-88 can be wired as two separate 8-inch, 8-Ohm subwoofers, or as one dual 8-inch, 4-Ohm or 16-Ohm subwoofer. Each configuration can also utilize the MCS-88's built-in low-pass crossover, which can be switched off when used with newer A/V receivers and preamplifiers with built-in bass management. The MCS-88 can deliver bass down to an impressive 40-Hertz.

For commercial applications, RBH offers the MC-615-70 and the A-615-70 in-ceiling loudspeakers. Both models feature a unique design that allows them to be run in a typical 8-Ohm fashion, or selectable 70-volt operation. RBH designed a knob (accessed from the front of the speaker) to allow for selectable 8-Ohm mode, or for 2, 4, 8, 16 and 32-watt taps for 70-volt operation, which allows great flexibility in both small and large commercial installations. In addition, the MC-615-70 features a tweeter level control (accessed from the front of the speaker) allowing the installer to choose from a standard-level setting or from -3dB or +3dB. Other features include a UL-listed fireproof rear enclosure and built-in eyelets to accommodate

seismic straps to meet building codes. The audiophile-grade MC-615-70 borrows its 6½-inch aluminum woofer and 1-inch aluminum tweeter from RBH's popular residential MC Series speakers. For the budget-minded, the A-615-70 features a polygraphite 6½-inch woofer mated with a 1-inch silk-dome tweeter.

Suggested retail pricing is as follows: TK-615, \$329/pair; MCS-88, \$399/each; MC-615-70, \$299/each; A-615-70, \$179/each. The TK-615 is now available. The MCS-88, MC-615-70 and A-615-70 are expected to ship March/April 2003.

Since 1976, RBH Sound has been designing, engineering and crafting high-performance loudspeaker systems, delivering superior acoustic reproduction at sensible prices.
