RBH ADDS TWO NEW BASS AMPLIFIERS TO THEIR MIX OF AWARD WINNING LOUDSPEAKERS

Model SA 200 and SA 400 designed to work with passive RBH subwoofers.

Las Vegas, NV – CES 2002, January 7-11 LVCC South 1-2 booth #D23151 -- RBH Sound Inc. introduces the SA 200 and SA 400, a pair of new bass amplifiers built specifically for the passive versions of their award-winning subwoofers. Both amplifiers offer the same great performance of the amps found in the powered versions of RBH's subwoofers in an attractive, rack-mountable chassis.

With the advent of the powered subwoofer and the conveniences they offer, passive subwoofers have all but gone along the wayside. What about the installation that requires the subwoofer to be tucked into cabinet, or in the floor? The amplifier controls cannot be reached without tearing out the custom install you paid so much money for. This is why RBH is committed to still offering un-powered versions of their subwoofers, and building the amplifiers that power them.

The SA 200 and SA 400 are rack-mountable, subwoofer amplifiers rated at 200 and 400-watts respectively. These amplifiers are built for the ultimate in performance using Torodial transformers, discreet output devices and are rated into 2-0hms at full power output. Both amps accept either a low-level connection from a receiver or preamp, or speaker level connections from the main left and right speakers.

Auto on/off, phase, defeatable bass boost (4db @ 25-Hertz) and a defeatable low-pass crossover can be accessed from the front panel as well as a variable crossover (40-Hz – 180-Hz) and volume control for total control of the subwoofer. Short circuit and thermal protection ensure that the amplifiers won't "fry" or send potentially damaging signals to the subwoofer.

Suggested retail pricing of the SA 200 and SA 400 is \$549 and \$749 respectively and are shipping now.

Since 1976, RBH Sound has been designing, engineering and crafting high-performance loudspeaker systems, delivering superior acoustic reproduction at sensible prices.
