RBH SOUND INTRODUCES COMPACT THEATER ON-WALL SPEAKERS

WM-24s deliver exceptional performance in sound and style as RBH enters the on-wall speaker category.

CEDIA EXPO 2005 – Sept. 7-11 – RCA Dome, Booth #1329 & SR-5 – Packed with convenience, style and their award-winning sound, RBH Sound introduces the WM-24 on-wall speakers. Precisely engineered to deliver an incredible audio experience and designed to complement flat screen displays, the WM-24s are proving to be powerful, wall-mounted contenders.

“Many of our dealers have asked RBH to develop an on-wall ‘plasma-friendly’ speaker,” states RBH president Roger Hassing. *“Rather than produce another ‘me-too’ speaker designed solely with aesthetics in mind, we have applied extensive research to respond with the perfect marriage of performance and aesthetics as seen in our WM-24.”*

Selecting one from the infinite number of speakers available to match décor and other home theater equipment can leave consumers reeling. RBH’s WM-24 speakers make the decision a little easier by offering a comparatively affordable alternative while delivering audio-purist quality sound. A welcomed addition to RBH’s award winning Compact Theater (CT) Series; the WM-24s are quickly distinguishing themselves as the CT Series’ flagship product.

Outfitted with RBH’s proprietary 4-inch dual-active and 4-inch dual-passive aluminum woofers and a 1-inch silk dome tweeter, the WM-24s are equally adept at reproducing demanding musical sequences and life-like special effects. The tweeter protection circuit featured on the WM-24 eliminates tweeter damage by allowing the compact speakers to achieve exceptional detail and sonic accuracy without being overdriven by over-zealous enthusiasts.

Regardless of room size, the on-wall speakers remain virtually unobtrusive measuring less than 4-inches in depth, while offering interchangeable mounting options and convenience. Position the WM-24s horizontally for a center, or rotate vertically for left, right and surround channels. Designed to match a wide array of flat panel television displays, the WM-24s boast an extruded hairline brushed aluminum exterior with removable black or silver cloth grilles.

The WM-24 wall-mounted speakers are sold separately and include wall-mount brackets and black and silver fabric grilles. The WM-24 measures 24"H x 7.125" W x 3.75" D and each weigh 9.5 pounds. MSRP is \$449/ea. The WM-24s are shipping now.

For more information on RBH Sound, please call 800.543.2205 or visit www.rbhsound.com.

Since 1976, RBH Sound has been designing, engineering and crafting high-performance loudspeaker systems, delivering superior acoustic reproduction at sensible prices.
