CT-7.1

CT-5.1

Over the years, we have been recognized for the superior sound of our loudspeakers and commended for our technical achievements and advancements in acoustic reproduction. RBH's innovative Compact Theater systems exemplify our commitment to adapting to the changing home theater environment, while continuing to foster quality craftsmanship and exceptional performance.

**Innovation:** The RBH Compact Theater 7.1 is the first system of its kind, designed to adapt to the growing demands of today's home theater. With many new surround sound formats emerging, RBH continues to stay ahead of the times by crafting an advanced and affordable solution. The CT-7.1 brings together seven sonically matched speakers, including a center channel and a powerful subwoofer transporting the invigorating sound and feeling of a movie theater into your own home.

**Flexibility:** At RBH, we understand not everyone is prepared to take the plunge into seven-channel surround sound or may not yet have the equipment to support a system of this caliber. For this reason, we also offer a standard CT-5.1 system that boasts the same build quality and materials as its sophisticated counterpart. Unlike other speaker manufacturers who provide lesser-priced, lesser-quality versions of their top lines, the proprietary aluminum cone drivers, which make up the CT-5.1 are the exact same speakers used in the CT-7.1. By simply acquiring another pair of MM-4 speakers, you can enjoy the benefit of making the effortless transition from a 5.1 to a 7.1 surround sound speaker system.

**Appearance:** Our designers also appreciate that some living rooms cannot accommodate large speakers and some décors simply were not meant to. Based on this, we endeavored to create an unimposing speaker system which easily fits into any lifestyle. At RBH, we refuse to sacrifice our integrity by compromising the overall performance of our speakers: our Compact Theater systems speak for themselves. In addition, the speaker packages are available in white, silver with black grilles or black to better match your décor.

**Detail:** The Compact Theater systems offer the unparalleled value and an incomparable attention to detail which have come to be expected from RBH. In crafting the CT systems, we sought to maximize the performance of these tiny speakers and create the illusion of a movie theater within the confines of a home theater. The center and satellite speakers are constructed from die-cast metal enclosures that make the speakers extremely inert; the non-parallel sidewalls also help eliminate internal standing waves. Our novel approach to the construction of these cabinets is complemented by the driver technology found within. The workmanship behind the CT systems is unmatched by other home-theater-in-a-box systems and places them in a class of their own.

**MM-4** Mini-monitor

Drive Units: 4" (101mm) woofer  
1" (25mm) tweeter  
Power: 100 Watts  
Sensitivity: 85dB<sup>1</sup>  
Impedance: 8 Ohms  
Dimensions: 5"W x 7¼"H x 4½"D  
Frequency Response: 100Hz - 20kHz ±3dB  
Crossover Frequency: 3000Hz  
Video Shielding: Standard  
Weight: 4 Lbs.

**C-4** LCR / Center Channel

Drive Units: 2-4" (101mm) woofers  
1" (25mm) tweeter  
Power: 120 Watts  
Sensitivity: 88dB<sup>1</sup>  
Impedance: 4 Ohms  
Dimensions: 11¾"W x 5"H x 4½"D  
Frequency Response: 100Hz - 20kHz ±3dB  
Crossover Frequency: 3000Hz  
Video Shielding: Standard  
Weight: 8 Lbs.

**MS-8.1** Powered Subwoofer

Drive Units: 2-8" (202mm) woofers  
Power: 200 Watts  
Sensitivity: N/A  
Impedance: N/A  
Dimensions: 11¾"W x 13"H x 13"D  
Frequency Response: 35Hz - 180Hz ±3dB  
Crossover Frequency: 50-160 (variable)  
Video Shielding: N/A  
Weight: 35 Lbs.

**Notes:**  
1 — 2.83V @ 1 Meter
