**FOR IMMEDIATE RELEASE**

### **RBH SOUND INTRODUCES “REFERENCE” SIGNATURE SERIES IN-WALL SPEAKER LINE**

**LAYTON, UTAH – USA – August 1, 2008** – RBH Sound, a leading manufacturer of high performance home audio products, today unveiled information and details of their new Signature “Reference” In-wall speaker product lineup. The Signature Reference In-wall lineup, consisting of five models, is considered an upgrade to RBH Sound’s popular Signature In-wall lineup, and was developed by RBH Sound to be the in-wall complement to the company’s Signature Reference freestanding models. Some of the Signature Reference In-wall models will be shown in RBH Sound’s exhibit (SR-9 and booth #112) at the upcoming CEDIA Expo in Denver Colorado, September 4-7, 2008.

The five Signature Reference In-wall models are the SI-740/R, SI-760/R, SI-770/R, SI-6000/R and SI-6100/R. To sonically match the Signature Reference freestanding models, each Signature Reference In-wall model incorporates one or more upgraded, high performance proprietary 6.5-inch aluminum cone woofers borrowed from RBH Sound’s sister company, Status Acoustics. These woofers feature a fixed-phase plug which reduces acoustic “beaming”, while simultaneously increasing power handling. High frequencies are reproduced by high end magnetic fluid-cooled tweeters featuring exceptional power handling and excellent dispersion characteristics.

The Signature Reference In-wall lineup, as does the standard Signature In-wall lineup, incorporates a tuned backbox rear enclosure for each model. These backboxes guarantee perfect placement and provide a perfectly tuned environment for consistently easy installation. When finished, only the baffle of the speaker shows through the drywall, and a black or off-white fabric grille finishes the look.

Details on each model are as follows:

- The SI-740/R features a single woofer and tweeter, can handle up to 175 Watts, has a frequency response of 60Hz-20kHz  $\pm$ 3dB and has a suggested retail of \$949/each.
- The SI-760/R features dual woofers and one tweeter, can handle up to 250 Watts, has a frequency response of 60Hz-20kHz  $\pm$ 3dB and has a suggested retail of \$1,209/each.
- The SI-770/R has the same driver complement and performance specifications as the SI-760/R, but is specially designed to be directly installed into custom cabinetry. The SI-770/R's suggested retail is \$1,209/each.
- The SI-6000/R features four woofers and one tweeter, can handle up to 300 Watts, has a frequency response of 45Hz-20kHz  $\pm$ 3dB and has a suggested retail of \$2,049/each.
- The SI-6100/R features four woofers and three tweeters, can handle up to 500 Watts, has a frequency response of 45Hz-20kHz  $\pm$ 3dB and has a suggested retail of \$3,309/each.

According to RBH Sound's Marketing Director, Daren Egan, "The Reference version of the Signature In-wall lineup is the epitome of what RBH Sound is all about. The performance the Signature Reference In-wall models provide is outstanding relative to their cost, proving once again that RBH Sound products are indeed a great value. We're excited about this series, and know that these models are exactly what audio and home theater connoisseurs are looking for in an ultra high performance in-wall speaker."

The Signature Reference In-wall lineup is available and shipping now.

#### About RBH Sound

Since 1976, RBH Sound has been designing, engineering and crafting high-performance audio products, delivering superior acoustic reproduction at sensible prices.
