PRESS RELEASE

FOR RELEASE ON OR AFTER JANUARY 8, 2009

RBH SOUND BOWS NEW SIGNATURE SERIES SPEAKER

LAS VEGAS, NEVADA – CES 2009 – SUITE 29-103 – JANUARY 8, 2009 – RBH Sound, a manufacturer of high performance home audio products, today unveiled two new additions to their award-winning Signature Series speaker lineup. The industry's first look at these incredible new speakers takes place this week in the company's suite (29-103) in the high performance audio section at the Venetian Hotel and Casino as part of the 2009 Consumer Electronics Show (CES) in Las Vegas, Nevada.

The new Signature Series models revealed to CES attendees today were the 8300-SE and the reference version, the 8300-SE/R. Employing RBH's proprietary aluminum cone technology, each model features three 8-inch aluminum cone subwoofers, two 6.5-inch aluminum cone woofers and a 1-inch soft dome tweeter. The reference version, the 8300-SE/R, features upgraded 6.5-inch fixed phase plug aluminum cone woofers, a liquid-cooled Scanspeak silk dome tweeter, and a modified crossover network to manage the upgraded drivers. The reference-level upgrades provide increased power handling and improved resolution, resulting in increased sonic clarity.

The 8300-SE and 8300-SE/R is 55-3/8" high, 10-7/8" wide (13-1/2" with feet), and 17" deep. The cabinet is constructed of .75-inch MDF and is internally-braced to eliminate standing waves and cabinet resonance. An acoustic suspension design, the 8300-SE and SE/R features a highly efficient, dimpled front-firing flared port which works in conjunction with the three 8-inch woofers to allow the frequency response to extend down to a bone-rattling 22Hz! True to the RBH Sound Signature Series tradition, the cabinets are custom-finished in one of RBH Sound's 30 uniquely different custom woodgrain veneers. To appease audio purists, the 8300-SE and SE/R features two pair of high quality five-way binding posts, allowing for bi-wiring and/or bi-amplification.

The 8300-SE and SE/R can handle up to 400 Watts, have a frequency response of 22Hz-20kHz, and weigh 115 pounds each. The 8300-SE has an initial suggested retail price of \$7,999 per pair, and the 8300-SE/R has an initial suggested retail price of \$8,449 per pair. Both are expected to begin shipping in April.

About RBH Sound

Since 1976, RBH Sound has been designing, engineering and crafting high-performance audio products, delivering superior acoustic reproduction at sensible prices.
