

SIGNATURE SERIES

IN-WALL SPEAKERS AND SUBWOOFERS

SI-10

IN-WALL SUBWOOFER

Typically, freestanding enclosure or cabinet subwoofers perform well, but don't really complement an in-wall home theater installation. With the SI-10 in-wall subwoofer, we've taken the performance of our legendary TS-10 freestanding subwoofer and hidden it in the wall. The SI-10 features a non-powered 10-inch aluminum cone subwoofer inside a rigid MDF (medium density fiberboard) cabinet which fits in-between standard 2x4 wall studs. The only exposed part of the subwoofer is the black or white cloth grille. The SI-10P includes an RBH SA-500DSP component-style subwoofer amplifier.

RBH Sound Signature Series in-wall subwoofers are designed and engineered to provide conventional, freestanding speaker performance while inconspicuously installed into the wall or behind a perforated screen. Featuring our proprietary, ultra-rigid aluminum cone woofers offering unsurpassed acoustic detail and accuracy. To better coordinate with many décors, grilles are available in either black or white. The SI-10 model is designed to fit into standard 2x4 (16-inch on center) stud-framed walls for in-wall or in-ceiling installation.

The SI-10 model is available with separate component-style subwoofer amplifier (SI-10P)
