RBH 21in Carbon
Fiber Cone

If you crave BIG bass but you're tight on space, the passive RBH 21-MP subwoofer is the perfect solution. Two of this thinner, 15 inch deep variant of our full-sized 21in sub is even better!

Designed to provide ultimate home theater performance with flexibility to use almost anywhere. It also works great behind acoustically transparent screens and for whole-house installs.

21-MP

The 21-MP Subwoofer is a beast in a manageable size! It features our RBH 21in Carbon Fiber Cone driver custom designed and built in the USA. It is capable of an impressive 4,000 watts of thermal power handling controlled by a long throw suspension and a stacked neodymium multi-cylinder motor structure. It's driven to prodigious levels of output and very low frequencies by our DA-2602DSP chassis amplifier. A perfect mate due to its 4000 watt power capability in bridged mode. This exceptional driver is housed in a sealed, thick HDF cabinet. The bass output is clear, clean and quick. Surprisingly so for such a large woofer driver. This is due to the extremely rigid and very light Carbon Fiber cone beautifully sealed with a gloss acrylic coating. The relatively small cabinet size makes this a easy, performance elevating addition to your theater or stereo listening experience. The impact and depth the 21-MP will provide is trully breathtaking.

Subwoofer Signature In-wall Series

- RBH proprietary 21 inch Gloss Acylic coated Carbon Fiber cone driver driver housed in heavy duty cast aluminum basket.
- Provides timbre matched options for multi-channel sound across most freestanding, bookshelf, on-wall and in-wall products in the RBH family
- Cabinet made in USA of High Density Fiberboard (HDF)
- Available in satin white or black

*Limited 10 Year subwoofer, 3 Year amplifier Warranty (with registration) from date of purchase to be free from defects and workmanship. For more information contact your RBH dealer or check our website.
