# AC-525 CENTER CHANNEL SPEAKER

---

THIS PRODUCT WAS DISCONTINUED JUNE 2004

At first glance one might say, "Wait a minute, there's one too many tweeters". But the dual tweeter design of the AC-525 allows a lower crossover point to be used between the tweeters and mid-woofers. The result is better control of the off axis horizontal response and reduced lobbing as compared to a single tweeter center channel design. Not to mention the ingenious swivel stand makes aiming the AC-525 at the listening position a snap.
