BT-100

BLUETOOTH® STEREO AMPLIFIER

The BT-100 amplifier is a new, innovative device that fully overturns the traditional way of listening to music. The BT-100 features state-of-the-art Bluetooth® technology, allowing wireless connections from a distance of up to 100-feet. Analog and digital inputs give the BT-100 the ability to adapt to today's media sources, putting a completely modern, wireless spin on an old icon.

1 Years*

High Performance Home Audio
Redefining the Way You Experience Sound™

With its Bluetooth® capability, the BT-100 provides the convenience of wireless streaming the highest quality audio from any Bluetooth-enabled smartphone, tablet or PC. With power that really delivers providing 100W RMS (50W x 2) @ 4 Ohms or 50W RMS (25W x 2) @ 8 Ohms per channel may sound small, but like all RBH Sound amplifiers, the BT-100 can outperform amplifiers that are much larger. With its very small form factor, the BT-100 astounds many due to its ability to power larger loudspeakers to satisfying levels without adding noise or distortion. The BT-100 features aptX® CODEC technology thus allowing enjoyment of much higher quality sound when connected to any Bluetooth® aptX® enabled device.
