

EMP TEK SERIES

E10s SUBWOOFER (150 Watt)

THIS PRODUCT HAS BEEN DISCONTINUED

Subwoofers don't just shake the room, they add dynamics and realism to your favorite movies and music. The addition of a really good powered subwoofer like the E10s to a home theater or home audio system can bring much more enjoyment and depth to your home theater experience. The E10s' built-in 150 Watt RMS amplifier and 10-inch proprietary aluminum cone subwoofer makes the explosions and other bone-chilling low frequency effects of movie soundtracks feel so real, you'll think you're right in the middle of the action! With its easy and simple connections and configuration options, the E10s can be added to any audio system or surround receiver, and can even automatically turn itself on whenever it's needed. Other features like adjustable phase and volume controls give you the ability to fine tune the E10s to work perfectly in your home theater. If you're looking to add considerable low-frequency, deep bass performance to your home theater or audio system, the E10s is the subwoofer you've been looking for.

SPECIFICATIONS
