FM-45

Freestanding Tower Loudspeaker

Applications:

The FM-45 is a 45-inch tall freestanding tower speaker which features RBH's proprietary aluminum cone technology and closely resembles its on-wall siblings, the WM-24 and WM-30. Featuring a 1-inch soft dome tweeter, two 4-inch aluminum cone mid-woofers and two 8-inch aluminum cone woofers, the FM-45 provides excellent acoustic resolution and detail. The FM-45 can also be bi-wired and/or bi-amplified to provide enough bass to essentially eliminate the need for a separate subwoofer.
