

44-SE

ON-WALL SURROUND SPEAKER

Retaining all the features and benefits of the 66-SE, the 44-SE is designed for home theater systems requiring a smaller footprint for the surround speakers. The 44-SE's dual, in-phase 4-inch aluminum cone woofers deliver high fidelity bass and mid-range frequencies while out-of-phase dual 1-inch silk dome tweeters distribute diffused, articulate high frequencies. For high performance surround sound from a small footprint, the 44-SE is the perfect solution. Like the 66-SE, the 44-SE is easily installed on a wall using the integrated keyhole brackets. Shown here in standard black ash.
