

66-SE

ON-WALL SURROUND SPEAKER

The 66-SE is designed specifically for use as rear effects channels in a home theater system. Providing timbre-matched surround sound consistent with the high value of the Signature Series, the 66-SE features a unique bi-/di-polar configuration. In-phase are dual 6½-inch aluminum cone woofers providing rich, deep bass and mid-range frequencies, while out-of-phase dual 1-inch silk dome tweeters provide crystal clear, diffused sonic accuracy. The primary benefit of this design is the 66-SE's ability to reproduce high performance surround channel information from a position which cannot easily be located by the ear. The 66-SE is easily installed on a wall using the integrated keyhole brackets. This model is only available in custom veneers.
