

641-SE

TOWER SPEAKER

Smaller home theaters and cozy living rooms are two perfect environments for the 641-SE. Two side-firing aluminum cone 6½-inch subwoofers, a 4-inch aluminum cone woofer and a 1-inch silk dome tweeter come together in the 641-SE's very slender profile. Although it is one of the smallest tower speakers RBH Sound manufactures, the 641-SE is not small on sound. The 641-SE can also be bi-wired or bi-amplified to obtain higher performance and fidelity. Shown here in sapele pommele veneer, this model is only available in custom veneers.
