

6100-SE/R

LCR / CENTER SPEAKER

Larger rooms and home theaters often require speakers which can adequately handle a larger area without any decrease in performance; the 6100-SE/R is specifically designed to accomplish this task. The reference version of the 6100-SE, the 6100-SE/R can be used vertically as left and right main channels for two- or multi-channel systems. It can also be used horizontally as a center channel for larger home theater systems. Shown here in macassar ebony finish, this model is only available in custom wood finishes.
