

1266-SE/R

TOWER SPEAKERS

Intended for high-end audio and home theater systems where extreme performance and ultra high fidelity is a must, the 1266-SE/R is the reference version of the 1266-SE 3-way tower speaker. The 1266-SE's attractive, slender profile provides its listeners with a tightly-focused image for stereo listening; this profile also fits next to larger screens and monitors much easier than conventional tower speakers. This model is only available in custom veneers.
