

1010-SEP/R

POWERED SUBWOOFER

The reference version of the 1010-SEP, the 1010-SEP/R is a dual 10-inch long-throw aluminum cone subwoofer uses the same high performance ultra long throw driver found in the T-30LSE. This drive is nearly double the output on the standard 1010-SEP driver. The subwoofer is available with or without an integrated, feature-laden 350 Watt power amplifier. Used as the subwoofer sections for the Signature Reference Series T System for its reference-grade performance and clarity, the 1010-SEP/R provides tremendous amounts of accurate, defined bass down to 18Hz! The 1010-SEP/R is the perfect powered subwoofer for larger home theater and music systems. Shown here in pecan veneer, this model is only available in custom veneers.
