

T-1

MODULAR SPEAKER

The award-winning T-1 is the foundation of the RBH Sound T System. Four 6½-inch aluminum cone woofers and three liquid-cooled silk dome tweeters come together in a dispersion-averaging alignment for the ultimate in sound quality and performance. The T-1s driver configuration focuses the sound at the listening position for incredible imaging. The T-1 comes in mirror-image pairs and can be used as a freestanding speaker, custom installed into a cabinet, or purchased as a package with one or two subwoofers in a T-2 or T-3 configuration.

DIMENSIONS

CONFIGURATIONS

The mid-range and bass drive units of the T System are of the highest quality and feature cutting-edge aluminum cone technology. The woofers and tweeters are arranged in a dispersion-averaging alignment that focuses the sound at the listening position for unbelievable imaging. Working in harmony, all drive units are governed by an extensive filter network to convey the sonic realism you'd expect from this reference-grade speaker system.
