

T-3

TOWER MODULAR SPEAKER

The T-3 comes in mirror-image pairs and can be used as a free standing speaker, as a custom install speaker placed in a cabinet, or purchased as a package including subwoofer amplifiers. The T-3 has a dynamic range that clearly puts it in a league of its own, delivering the ultimate in performance for large-scale music and home theater systems. Producing sound pressure levels that would rival a commercial theater, the T-3 provides astounding sonic clarity throughout the frequency spectrum. The T-3 also offers the most flexibility, allowing for both full-range and LFE configurations for the 1010-SEN sections. Shown here in South American rosewood veneer.

DIMENSIONS & CONFIGURATIONS

FRONT VIEW

SIDE VIEW

The mid-range and bass drive units of the T System are of the highest quality and feature cutting-edge aluminum cone technology. The two 10-inch long-throw subwoofers deliver plentiful amounts of low frequency information. Mid-bass through lower treble frequencies are accurately reproduced through four 6½-inch woofers offering extended dynamic range and lower distortion. Three 1-inch silk dome high performance tweeters provide generous crystal clear high frequencies with unbelievable detail and accuracy. The woofers and tweeters are arranged in a dispersion-averaging alignment that focuses the sound at the listening position for unbelievable imaging. Working in harmony, all drive units are governed by an extensive filter network to convey the sonic realism you'd expect from this reference-grade speaker system.
