

T-30LSE

FREESTANDING TOWER SPEAKER

The T-30LSE is the result of combining the latest in speaker technologies with over three decades of engineering expertise. At the forefront of the best-of-the-best freestanding speakers, the T-30LSE is an audio enthusiast's dream come true. Higher resolution and increased articulation are the end result of the T-30LSE's design. The woofers and tweeters are arranged in a dispersion-averaging alignment that focuses the sound at the listening position for unbelievable imaging. Another benefit of this alignment is reduced sound reflections from other surfaces in the listening environment. These sonic attributes are not typically found in a speaker capable of delivering the sound pressure levels the T-30LSE can produce. The T-30LSE is only available in custom veneers.
