

# SX-T2/R

LEFT/RIGHT FRONT MAIN SPEAKER

Designed for larger home theaters and listening rooms requiring reference-level performance, the modular RBH SX-T2/R consists of an SX-T1/R securely mounted atop a SX-1010N/R. Outfitted with reference-grade components, the SX-T2/R greatly improves upon the award-winning performance of its sibling, the SX-T2. The Danish tweeters boast improved resolution through the use of a larger motor structure and increased power handling. The 6½-inch aluminum cone woofers that give the Signature Series its great bass to upper-midrange performance are upgraded to a more advanced aluminum cone woofer featuring a fixed-position phase plug. The addition of this phase plug extends the frequency response of the woofers, resulting in increased clarity.

Also upgraded are the dual 10-inch subwoofers, with vastly enhanced motor structures which give the subwoofers higher output capability and increased power handling. The SX-T2/R is currently available in black oak with a satin front baffle.
