

SX-1010N

NON-POWERED SUBWOOFER

Inheriting the award-winning performance from its 1010-SE sibling, the SX-1010N combines style with brute strength and precision. Dual 10-inch aluminum cone woofers and a front-firing vent work in unison to outperform subwoofers costing much more. The SX-1010N non-powered subwoofer is designed to be used with an outboard subwoofer amplifier.

As part of the Signature SX Series configuration, the SX-1010N is designed to support the SX-T1 when combined for use in larger home theaters.
