TK-515C

2-way LCR Bookshelf Speaker

Applications:

The TK-515C, featuring two 5¼-inch proprietary fiberglass cone woofers, is designed to be used primarily as a center channel for a TK Series home theater system. However, the elevated performance of the TK-515C can also be enjoyed as a stereo pair simply resting on a bookshelf. Since its primary use is as a center channel, the TK-515C can be placed in close proximity to a CRT television/display without causing interference due to its video shielding.
