

IMPRESSION SERIES

RS10i POWERED SUBWOOFER

**THIS PRODUCT WAS DISCONTINUED
SEPTEMBER 2014**

The RS10i powered subwoofer has its own source of amplification, and a variable crossover, adjustable phase control and auto on/off are also used for convenience and easy integration with other speakers. Audio can be supplied to the subwoofer by either interconnect (processor/line level). The 10-inch poly-matrix cone woofer enhances bass definition and accuracy. A built in limiter protects the subwoofer from being over driven and bottoming out. Available in high-gloss red burl.
