

Product Specifications

QT605 THIN LINE IN-CEILING SPEAKER

Description:

The QT605's thin line streamlines the in-ceiling speaker look with a new thin flange, and low profile micro-perforated grille, causing the look of the speaker to be exceptionally unobtrusive by mounting flush to a ceiling. The QT605 is ideal for many applications where traditional speakers may be impractical or impossible. An innovative mounting mechanism speeds up speaker installation time. This mechanism requires the installer to simply push either the supplied L-shaped tool or a screwdriver straight into the socket to activate the mounting mechanism. It will then automatically swing out and lock the speaker into place in the ceiling. The QT605 employs a 6½-inch polygraphite woofer cone and a 1-inch swivel fabric dome tweeter for great sound. The QT605 is especially well suited for distributing sound throughout the entire home and can be used to enhance surround sound systems. The QT605 is packaged with an L-shaped quick installation and removal tool, grille adhesive; hole cutout template and paint mask.

Applications:

- Multi-room Audio
- Home Theater
- Pools, Spas, Hot Tub Rooms, etc.

Technical Information:

Model Number:	QT605
Series:	Builders Thin Line Quick Mount
Special Feature:	Thin Flange
Woofer:	8½" (165mm) Poly Graphite
Tweeter:	1" (25mm) Swivel Fabric Dome with ±3dB Switch
Power Handling:	2-60 Watts
Impedance:	8 Ohms
Frequency Response:	56Hz–20kHz
Sensitivity:	88dB
Color:	White
Grille:	White (paintable aluminum)
Cutout Dimensions:	8.375" (213mm) Dia.
Finished Dimensions:	9.375" (238mm) Dia.
Finished Depth:	2.55" (76mm)
Weight:	2.55 lbs. (1.16 kg) each
Warranty:	10 years
