

Product Specifications

CS100 COMPACT BOOKSHELF SPEAKER

Description:

The CS100 compact bookshelf speaker is the perfect answer for “space challenged” rooms. These speakers may be compact in size, but there is nothing compact about their sound. Using a 4-inch aluminized fiberglass matrix woofer and a 1-inch soft dome tweeter, the CS100 provides crystal clear sound for music or home theater. This speaker is a stylish addition to any room and can pull double duty as both a main speaker and a surround speaker. A mounting bracket and the necessary hardware are included with the CS100 to allow them to be mounted to a wall or speaker stand (a great option for plasma TV owners).

Applications:

- Two-channel Audio
- Home Theater

Technical Information:

Model Number:	CS100
Series:	CS100
