## CS100C COMPACT CENTER CHANNEL SPEAKER

*With an extra 4-inch woofer in a woofer-tweeter-woofer configuration, the compact CS100C center channel speaker can easily and discreetly be placed atop a television or entertainment center to superbly perform its center channel duties.*

### **Description:**

The CS100C Compact Center Channel Speaker uses the same drivers as the CS100, making a perfect companion to the CS100 bookshelf speaker. These speakers may be compact in size, but there is nothing compact about their sound. Using two 4-inch aluminized fiberglass matrix woofers and a 1-inch soft dome tweeter, the CS100C provides crystal clear sound for music or home theater. This speaker is a stylish addition to any room. A mounting bracket and the necessary hardware are included with the CS100C to allow them to be mounted to a wall or speaker stand (a great option for plasma TV owners).

### **Applications:**

- Two-channel Audio
- Home Theater

<b>Model Number:</b>	CS100C
