CS500T TOWER SPEAKERS

THIS PRODUCT HAS BEEN DISCONTINUED AUGUST 2009

The performance from this ultra slim tower speaker is remarkable. The CS500T uses four aluminized fiberglass matrix mid-range drivers and a nano-silk tweeter to create stunning sound. The CS500T comes with a pewter baffle, and has sonically matched drivers and cabinet design making it the perfect companion for the CS500 rear/bookshelf speaker and the CS500C center channel speaker. Whether you want to use these speakers for listening to music or for home theater, you will find that they will provide dynamic sound for either application. The CS500T comes with a pewter baffle. However, the pewter baffle can be removed and replaced with a rosewood, cherry or black baffle. This provides great flexibility when it comes time to redecorate the room, or relocate the speakers. Just change the baffle on the face of the speaker, and it fits with the new decor.
