

# Product Specifications

SF10  
POWERED SUBWOOFER

## Description:

The SF10 powered subwoofer is a stylish and powerful subwoofer that will add depth and dimension to your music and movies. A subwoofer is a must-have component for any home theater or audio system. The performance of your subwoofer can greatly affect the overall performance of your system. The SF10 subwoofer can add considerable low-frequency, deep bass performance to any home theater or audio system. While active the SF10 powered subwoofer has its own source of amplification (as opposed to passive, non-amplified subwoofers which require an additional power amplifier). The SF10 powered subwoofer has an aluminum cone driver. The driver material produces enhanced bass definition and accuracy. A powerful magnet, enhanced suspension and heavy duty voice coil give the driver elevated performance allowing high output capability and accurate dynamic reproduction.

## Applications:

- Two-channel Audio
- Multi-room Audio
- Home Theater

## Technical Information:

**Amplifier Type:** Class D

**System Type:** Powered Subwoofer

**Subwoofer:** 10" (254mm) Aluminum Cone

**Voltage:** 110 and 220

**Amplified Power:** 150 Watts
