

CTx Series

COMPACT THEATER SPEAKERS

REDEFINING THE WAY YOU EXPERIENCE SOUND.™

RBH Sound CTx Compact Theater Speakers

RBH's innovative CTx Series exemplifies our commitment to adapting to the changing home theater environment, while continuing to foster quality craftsmanship and exceptional performance.

RBH Sound designers also appreciate that some rooms cannot accommodate large speakers and some décors simply were not meant to. Based on this, we endeavored to create an unimposing speaker system which easily fits into any lifestyle. At RBH, we refuse to sacrifice our integrity by compromising the overall performance of our speakers: our CTx Series speaks for themselves.

The CTx Series MM-4x and C-4x enclosures are constructed of extremely rigid fiber-reinforced polymer matrix composite, and the non-square sidewalls of the enclosures help to increase the overall sound quality. The S-8 powered subwoofer is made from ¾-inch Medium Density Fiberboard (MDF) to withstand the pressures and vibrations of strong bass at loud volumes. Unlike value-oriented "mini-systems", RBH Sound uses special aluminum cone woofers for the highest possible performance from these smaller speakers and subwoofers. RBH Sound's CTx Series makes it easy to upgrade from a standard 5.1 system. Newer surround sound formats seem to come out all the time, and typically require more than just five speakers and a subwoofer. Just by adding another pair of MM-4x speakers, you can easily upgrade to a 7.1 system and immediately enjoy the sonic benefits of a totally integrated and matched eight-speaker system. Designed to provide the finest quality surround sound experience, the RBH Sound CTx Series is among the best-of-the-best in smaller home theater systems.

Compact but mighty, the MM-4x mini-monitor pulls double duty as both a main speaker and a surround speaker. Its 4-inch aluminum cone woofer and 1-inch soft dome tweeter provide rich, full sound despite its compact size. The MM-4x can be conveniently mounted on optional speaker stands or mounted directly to the wall (a great option for plasma TV owners) using optional mounting brackets. With an extra 4-inch woofer in a woofer-tweeter-woofer configuration, the compact C-4x can easily and discreetly be placed atop a television or entertainment center to superbly perform its center channel duties. Due to its design, the C-4x can also be used throughout a home theater system and also works very well for two-channel music when combined with an S-8 powered subwoofer.

MM-4x Compact Bookshelf Speaker

Drive Units: (1) 4" (102mm) Woofer
(1) 1" (25mm) Tweeter
Power: 20-100 Watts
Sensitivity: 85dB (2.83V @ 1 Meter)
Impedance: 8 Ohms
Dimensions: 5¼"W x 7½"H x 4¾"D
(133mm x 191mm x 121mm)
Frequency Response: 100Hz-20kHz ±3dB
Crossover Frequency: 3000Hz
Cabinet Color: Black or White Satin
Grille Color: Black or White Fabric
Weight: 3.1 Lbs. (1.41 Kg)

C-4x Compact LCR/Center Channel Speaker

Drive Units: (2) 4" (102mm) Woofers
(1) 1" (25mm) Tweeter
Power: 10-120 Watts
Sensitivity: 88dB (2.83V @ 1 Meter)
Impedance: 6 Ohms
Dimensions: 14"W x 5"H x 4½"D
(356mm x 127mm x 114mm)
Frequency Response: 100Hz-20kHz ±3dB
Crossover Frequency: 3000Hz
Cabinet Color: Black or White Satin
Grille Color: Black or White Fabric
Weight: 6.5 Lbs. (2.95 Kg)

S-8 Powered Subwoofer

Amplifier Type: Class D
Drive Units: (1) 8" (102mm) Subwoofer
Voltage: 110 and 220
Power Handling: 150 Watts
Crossover Frequencies: 40Hz-150Hz (variable)
Frequency Response: 32Hz-150Hz (variable)
LFE Input: Yes
Line Level Input: Yes
Dimensions: 11" W x 12½" H x 12¾" D
(279mm W x 318mm H x 324mm D)
Cabinet and Grille Color: Black
Weight: 19.25 lbs. (8.73 kg)

CTx-5.1 System

The CTx-5.1 system consists of four MM-4x bookshelf speakers, a C-4x center channel and one S-8 powered subwoofer for excellent small home theater performance. Upgrade the standard CTx-5.1 system to a 7.1 system by just adding another pair of MM-4x speakers. Try swapping out the S-8 powered subwoofer for the S-10 powered subwoofer for an even more powerful sound system.

On the back of the C-4x there are two threaded keyholes one on each side for ease of hanging or mounting the speaker. On the back of the MM-4x there is one threaded keyhole for hanging or use the threaded insert on the bottom of the speaker for mounting to a bracket.
