ON-WALL & FLOOR STANDING SPEAKERS

REDEFINING THE WAY YOU EXPERIENCE SOUND.™

RBH Sound M Series On-wall & Floor Standing Speakers

RBH's award-winning sound is now available in the innovative M Series high performance on-wall and floorstanding speakers. The M Series models are designed to complement today's flat-panel televisions and monitors, and also feature RBH's proprietary aluminum cone technology.

Both WM-24 and WM-30 models include a wall-mount bracket and hardware. The wall-mount bracket allows the speakers to be mounted either vertically or horizontally. Mounted on the wall, the WM-24 and WM-30 are a mere 3¼-inches deep and exemplify the perfect marriage between performance and aesthetics. Both models are available in black hairline-brushed aluminum; also included with each model are black fabric grilles to match virtually any flat-panel display and décor.

Timbre-matched speakers throughout a surround sound system are essential for the best home theater experience. The FM-45 is timbre-matched to both the WM-24 and WM-30 on-wall models; making the FM-45 the best choice for those situations where floorstanding tower speakers can be used for front left and right channels. The FM-45 uses the same aluminum cone technology as do the WM-24 and WM-30 models, and also features powerful dual 8-inch woofers for deep and clear bass reproduction. Bi-amplify the FM-45 to unleash its full potential, and you won't need a separate boxy subwoofer. The FM-45 is available in black hairline brushed aluminum exterior and black fabric grilles.

The M Series on-wall speakers' unique design coordinates seamlessly with flat-panel televisions and monitors.

The WM-24 and WM-30 are precisely engineered to deliver an incredible audio experience; in addition, with its hairline brushed black aluminum exterior and removable black cloth grille, these on-wall speakers are designed to compliment virtually all flat screen displays.

Outfitted with proprietary 4-inch dual-active and 4-inch dual-passive aluminum woofers and a 1-inch silk dome tweeter, they are equally adept at reproducing demanding musical sequences and life-like special effects.

WM-24 On-wall LCR Speaker

Drive Units: (2) 4" (102mm) Active Woofers
(2) 4" (102mm) Passive Woofers
(1) 1" (25mm) Tweeter

Power: 75-120 Watts

Sensitivity: 90dB (2.83V @ 1 Meter)

Impedance: 6 Ohms

Dimensions: 7½"W x 24"H x 3¼"D
(181mm x 610mm x 83mm)

Frequency Response: 47Hz-20kHz ±3dB

Crossover Frequency: 3000Hz

Cabinet Color: Black Brushed Aluminum

Grille Color: Black

Weight: 9.5Lbs. (4.30 Kg)

Regardless of room size, these on-wall speakers remain virtually unobtrusive measuring less than 4-inches in depth, while offering interchangeable mounting options and convenience. Position the WM-24 or WM-30 horizontally for a center, or rotate vertically for left, right and surround channels.

WM-30 On-wall LCR Speaker

Drive Units: (2) 4" (102mm) Active Woofers
(2) 4" (102mm) Passive Woofers
(1) 1" (25mm) Tweeter

Power: 15-120 Watts

Sensitivity: 90dB (2.83V @ 1 Meter)

Impedance: 6 Ohms

Dimensions: 7½"W x 30"H x 3¼"D
(182mm x 762mm x 83mm)

Frequency Response: 47Hz-20kHz ±3dB

Crossover Frequency: 3000Hz

Cabinet Color: Black Brushed Aluminum

Grille Color: Black

Weight: 11 Lbs. (4.98 Kg)

The RBH Sound FM-45 features dual speaker binding posts and dual active 8-inch woofers which can be bi-wired or bi-amplified with a subwoofer amplifier such as the RBH Sound SA-200.

The FM-45 is a 45-inch tall freestanding tower speaker which features RBH's proprietary aluminum cone technology and closely resembles its on-wall siblings, the WM-24 and WM-30.

Featuring a 1-inch soft dome tweeter, two 4-inch aluminum cone mid-woofers and two 8-inch aluminum cone woofers, the FM-45 provides excellent acoustic resolution and detail. The FM-45 can also be bi-wired and/or bi-amplified to provide enough bass to essentially eliminate the need for a separate subwoofer.

FM-45 Floorstanding Tower Speaker

Drive Units: (2) 8" (203mm) Active Woofers
(2) 4" (102mm) Active Woofers

Power: (1) 1" (25mm) Tweeter

Sensitivity: 75-250 Watts

Impedance: 89dB (2.83V @ 1 Meter)

Dimensions: 8 Ohms
7½"W x 45"H x 16¼"D

Frequency Response: (182mm x 1143mm x 413mm)

Crossover Frequency: 40Hz-20kHz ±3dB

Video Shielding: 100Hz, 3000Hz

Cabinet Color: Black Brushed Aluminum

Grille Color: Black

Weight: 42 Lbs. (19.05 Kg)
