RBH Sound

SIGNATURE SX SERIES SPEAKERS

Most of the SX Series speakers and subwoofers are also available in the reference edition.

* LCR can be used as an Left, Center or Right Speaker
** Warranted from date of purchase to be free from defects and workmanship.
¹ Warranty 5 years on the cabinet and woofers, and 1 year on the amplifier

REDEFINING THE WAY YOU EXPERIENCE SOUND.™

Signature SX Reference Series

The Signature SX Reference Series was crafted specifically for the hard to please. Expanding on the superb performance of the SX Series, this series employs reference-grade components to satisfy even the most demanding audiophile. These high performance components work together to extend and enhance frequency response and resolution.

The introduction of these reference-grade components into the SX Series™ curved cabinetry significantly increases the sound quality, power handling and overall performance of each speaker model in the series. The SX Reference Series is finished in a very attractive standard satin black oak or sandalwood, or 30 different custom veneer finishes.

Signature SX Series

With the all-new Signature SX Series, long-standing manufacturing excellence and modern styling come together to create speakers unlike any other.

Despite the Signature SX Series™ great looks, sound quality is our first and foremost priority. The Signature Series has won many awards and accolades over the years for its outstanding performance, and we want this tradition to continue. To that end, we've incorporated our award-winning aluminum cone technology into each and every Signature SX Series model, and optimized each design to perform at its absolute best. Perhaps the single best attribute of the Signature SX Series may be the cabinetry; not only are the cabinets strong and attractive, the curved design functions to eliminate cabinet resonance, thereby increasing sound quality. Extensive, computer-optimized crossover networks assist the drivers to work seamlessly with the cabinets to deliver a sonic presentation so real, you'll swear the artists and actors are right there in your listening room or home theater.

The Signature SX Series combines the very best of modern technology with the tradition of handcrafted excellence that RBH Sound is known for.
