

T System

SIGNATURE SERIES MODULAR SPEAKERS

The RBH Sound T System conveys the sheer thrill of action movies and the delicacy of the finest music recordings as no other speaker can. Even the world's largest home theaters pose no challenge to the T System's power and dynamics. Despite its muscle, the T System can reproduce the softest whisper with the realism and depth serious audio enthusiasts demand. RBH's T System provides satisfying, enveloping and room-filling sound the entire family can enjoy.

REDEFINING THE WAY YOU EXPERIENCE SOUND.™

RBH Sound T System Modular Speakers

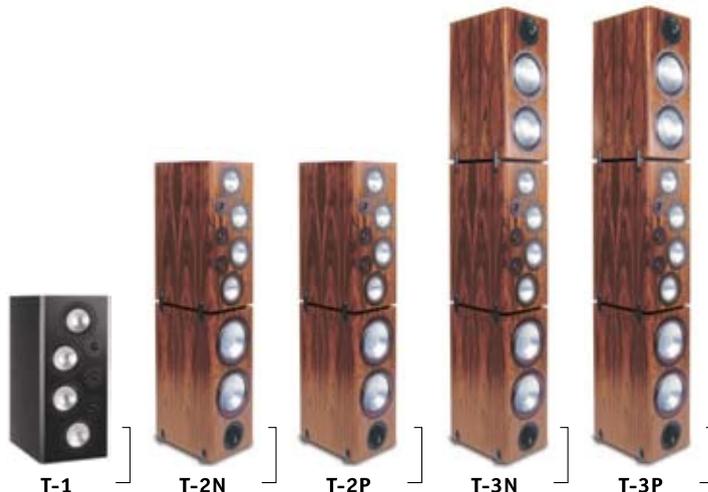

The T-1, T-2 and T-3 are the modular speaker models which make up the T System – the flagship of the Signature Series by RBH Sound Sound. This system is designed specifically for the most demanding audio and home theater enthusiast.

With four 6½-inch aluminum cone woofers and three 1-inch silk-dome tweeters, a power handling capacity of 500 Watts and a sensitivity of 92dB, the T-1 has a dynamic range that clearly puts it in a league of its own. The T-1's driver configuration focuses the sound at the listening position for incredible imaging. When mated with one or two 1010-SEN dual 10-inch aluminum cone subwoofers, the T-1 becomes a T-2 or T-3. The T-2 and T-3 are designed to provide definitive performance for large-scale music and home theater systems.

The T-2 consists of a T-1 atop a 1010-SEN subwoofer. The T-2 provides larger listening rooms and home theaters with astonishing clarity and performance.

For the person who wants nothing short of the best, the T-3 is the answer. By 'sandwiching' a T-1 between two 1010-SEN subwoofers, the towering T-3 provides astounding sonic clarity throughout the frequency spectrum, and can produce sound pressure levels rivaling that of a commercial theater. The T-3 also provides the most configuration flexibility in the T System, allowing for both full-range and LFE configurations for the 1010-SEN sections.

The T-1, T-2 and T-3 come in mirror-image pairs, and can be used as freestanding speakers or integrated into custom cabinetry.
