PREMIER IN-WALL LOUDSPEAKER BEST IN-CLASS PERFORMANCE

Your custom installed Premier 831-I is a reference LCR, designed for home theater, but with audiophile Hi-Fi in mind due to its use of a high output AMT tweeter vs a typical standard dome.

When room aesthetics are important, but uncompromised performance is your goal, the sealed, musically linear 831-I gives you the best of both worlds.

Premier 831-I & 831-9I

Combining the award-winning performance of its SV-831R sibling with the visual benefits of custom integration, the Premier 831-I is specifically designed for placement between 2x4 studs and behind an acoustically transparent screen. This LCR employs three 8-inch aluminum cone woofers and an AMT tweeter providing both high sensitivity and high power handling. It delivers paramount fidelity and performance for even the largest home theater or listening room.

For zero compromise, the Premier 831-9I provides a deep 9 inch cabinet that provides a volume equivalent to the SV-831R to match its performance perfectly, making it the perfect solution for seamless integration with SVTR(S) towers, or ultimate in-wall performance.

Premier Series

- Proprietary damped, black or silver aluminum drivers

- Heavily braced, HDF cabinet built in USA, sized to fit between studs placed 16" on center

- Tweeter protection circuitry is incorporated to prevent driver damage if over driven

- Separate baffle design allows for cabinet installation during construction without worry of driver damage

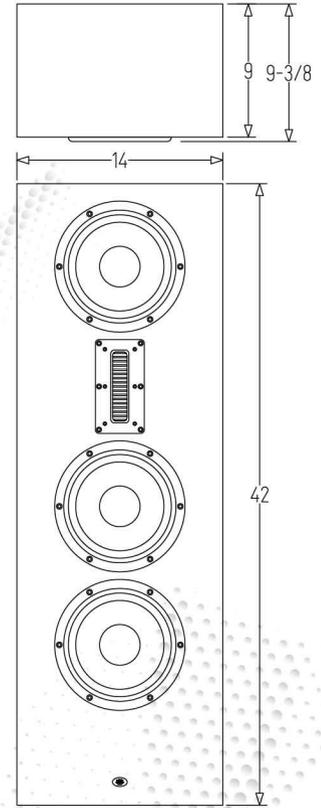

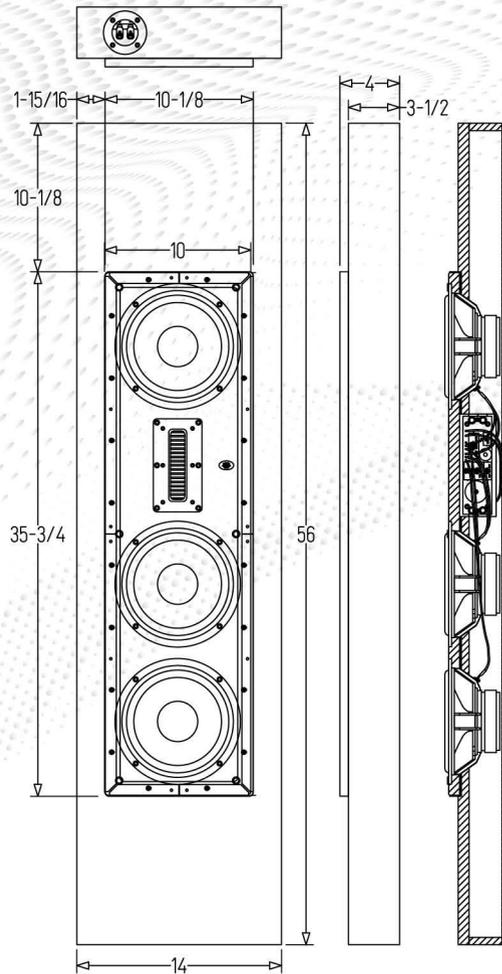

- multiple options in the series are designed for wide range of requirements

*Limited 10 Year Warranty (with registration) from date of purchase to be free from defects and workmanship. For more information contact your RBH dealer or check our website.
