

88-M | 1212-M Signature & Reference series

SLEEK SUBWOOFER MODULES SOLO or BASE for TOWER SYSTEMS

You will love the opportunities to bring amazing bass to spaces previously thought not possible. The Signature 88-M and Reference 1212-M deliver at levels way beyond their stature.

The rear ported Signature 88-M can be powered by your amp choice or our DA-1202DSP. Our in-board P-1602DSP amp powers the sealed Reference 1212-M with 2600 Watts of adjustable attitude!

Signature 88-M Reference 1212-M

You may recognize these as the subwoofer bases for our modular tower models 61/661-M and SFTR. They also serve very well as high output, narrow footprint subwoofers on their own to be placed in areas most subs can't fit. The Reference 1212-M with its dual high-excursion reference woofers powered by our RBH internal or external 1800W DSP amps, will provide extreme bass that belies its svelt appearance. You can easily find space for two, providing the best overall bass coverage. Sure to impress and bring life to any movie or music experience. If you really have a tight space check out our Signature 88-M. Not quite the boom factor of its big-brother but still very impressive to say the least. External amp is required, we suggest our DA-1202DSP to get the job done and enable sound contouring to make the Signature 88-M fill your space with awesome balanced bass.

Signature & Reference Series

- Available in black or silver, standard or, in the Reference 1212-M also reference aluminum drivers
